Summary

Jr. Full-Stack Web Developer with a curiosity to learn more, develop my skill set and find solutions to problems. This new career path is one with many hardships and it won't be easy at first but there's nothing else that sounds more fun and challenging than web development.

## TECHNICAL SKILLS

**Languages: HTML5, CSS3, JavaScript, JQuery, ReactJS, CSS, Bootstrap Node.Js Git Bash GitHub MySQL, MongoBD, Express, Handelbars.js**

## PROJECTS

## I know your past present and future

Git: https://github.com/Michaelswigart/I-know-your-past-present-and-future

- This is a project that keeps track of your schedule and your everyday work schedule.

- The design was a simple one with a focus on the functionality and usefulness for the user.

- The Languages used in this are : HTML, CSS, and JavaScript.

## I see weather on the horizon
Git: https://github.com/Michaelswigart/I-see-weather-on-the-horzion

Site: https://michaelswigart.github.io/I-see-weather-on-the-horzion/

- This is a weather app made to help you know the weather. It uses a simple design to prevent slow loading times and to only load what you're searching for about your area.

- This was a fun way to push learn how to use servers to get the data when needed.

- The Languages used in this are : HTML, CSS and JavaScript.

## Password Generator

Git: https://github.com/Michaelswigart/It-lives

Site: https://github.com/Michaelswigart/It-lives

- This is a password generator used to help you make a useful password to keep people out of your account.

- It would be a good idea to make a Password Generator to learn more about arrays and how to use/make them.

- The Languages used in this are: HTML, CSS and JavaScript.
